

# QUALISOFT

**QualiSoft** is a company specialized in the development of systems and products for the safe processing of electronic transactions. It has the most complete and modern family of products for automating electronic service channels, digital certification, solutions for leasing companies and transactional and security infrastructure.

Working in an increasingly more demanding and competitive market, where having technological and tool-based prominence is not sufficient, **QualiSoft** stands out due to its complete understanding of its clients' business, transforming ideas and technology into business solutions that translate into gains in quality, productivity, security and market for them.

Founded in 1994, **QualiSoft** quickly positioned itself in the market and today it is recognized for the quality and innovation of its products and services.

## Leading Companies in Their Sectors Use Our Products and Services

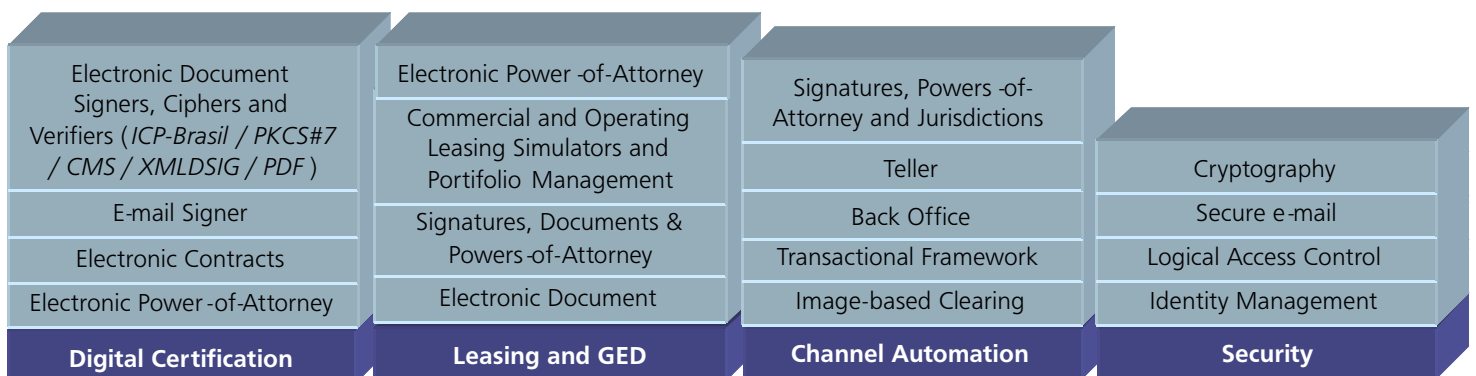

**QualiSoft** maintains a successful relationship with the largest Brazilian and global companies, in Brazil and abroad, in the financial service, insurance, commerce, services and government sectors.

## Services

Identifying experience and knowledge of its clients' businesses, plus the quality of its services, as true differentials to be incorporated to its current product and technology options, **QualiSoft** organizes itself to offer them in the following modess:

- ☑ Consulting Services
- ☑ Projects Factory
- ☑ Integration of Systems and Products
- ☑ Custom Software Development (Nearshore & Offshore)

## Areas of Specialization

# Products

Always aware of the constant technological and market evolutions, **QualiSoft** developed a complete line of products geared towards financial service, banking, e-commerce and insurance markets. This family of products encompasses business solutions, infrastructure, security and development tools.

## Identity, Security and Access Control Management

**E-QualiSG** permits the creation of Access Control Policies adjusted to each type of business and user, ensuring that only those people with the proper profile and competency will have access to the information and services offered. Provides user authentication through Digital Certificates, Biometry, integration with Active Directory (AD), among others.

## Leasing Systems

- Leasing Control** Management of Commercial and Operating Lease and Rental operations
- Leasing Price** Commercial and Operating Lease Operations Simulator
- Leasing Budget** Fiscal and Budgetary Projection of Commercial and Operating Leasing portfolio

## Branch & Correspondent Bank Automation

**QualiTC** is a branch automation system that aims at automating all transactions made at a bank agency or correspondent bank. **QualiTC** has Teller, Back Office and ATM modules encompassing Current Accounts, Investment Accounts, Savings, Collections, Billing and other banking products and services.

## Digital Signature and Certification

Since 2003, **QualiSoft** has continuously invested in the creation of Digital Signature & Certification solutions.

Its product portfolio in this area encompasses the Corporate e-mail Signer (**CeSigner**), Digital Signing and Electronic Document Management System (**e-Doc QualiSoft**), General Purpose Electronic Document Signer and Encrypter (**DeskSigner**) and PDF Document Signer (**DeskSignerPDF**). **QualiSoft** also provides a series of Software Development Kits (**SDK**) so developers can easily incorporate digital certification and signing technology applications as per **ICP-Brasil**, **PDF**, **CAeS**, **XadES** and **XMLDSig** standards.

## Image-based Clearing / Check Truncation

**QualiCheck** is a software solution that permits capturing (digitalization, indexation, storage and recovery) and checking signatures and formal aspects of checks through images.

**QualiCheck** stands out because it is a 100% web-based application and because it permits identifying the legal representatives with authority to sign the respective check, automatically and based on the signature on each check.

## Transactional Framework

**GlobalBanking® QualiSoft** is the most modern, complete and secure transactional infrastructure for processing financial and banking transactions. **GlobalBanking® QualiSoft** is based on fully open, market standard architecture. It incorporates all technological and business infrastructure needed to process banking and financial transactions, regardless of the service channel, keeping balances and statements updated in real time, administering future entries (scheduled), transaction limits by service channel, cut-off hours for products or transactions, as well as the capacity for 24x7 processing.

## Signature and Proxy Solutions / Electronic Power-of-Arrowney

These are indispensable solutions within the new context of digital signatures of electronic documents, as well as the reduction of operational risks required by Basel II. They permit real-time consultations of a company's legal representatives and proxies, indispensable features for obtaining all the benefits of Check Clearances with Images (Check Truncation). They manage and export legal representative and power-of-attorney data to the National Financial System Client Registry (**CCS**).

## Signatures, Documents and Powers-of-Arrowney

**QualiFP** is an advanced solution for Electronic Document Management (Signatures and Documents) that incorporates features for real-time control and approval of signatures, powers-of-attorney and jurisdiction of a company's legal representatives. **QualiFP** also permits the generation, storage, printing and administration of powers-of-attorney from pre-established models.

## Electronic Power-of-Arrowney

The **Electronic Power-of-Arrowney** is an innovative solution for generating, storing and recovering information powers-of-attorney, legal representatives and their proxies.

With the **Electronic Power-of-Arrowney**, there is no longer any need to type long legal texts, print them out on paper and authenticate signatures, etc. Everything is done electronically, including the signing of the power-of-attorney, which is done through digital certificates.
